Technical Specification – Bar Structures

Our modular bar units are built from a range of straight, curved, and angled segments, designed to create multiple forms and dimensions while maintaining a unified working surface.

Notes	Structure Details	External Dimensions
Overall Surface Height Work surface depth: 60 cm Bar top thickness: 4 cm		
Available for order as individual segments – total of 8 pieces.		Ø5m Curved Bar
Available for order as individual segments – total of 8 pieces.		Ø4m Curved Bar
Available for order as individual segments – total of 6 pieces.		Ø3m Curved Bar
100 cm Can function as a standalone segment		1m Straight Segment
200 cm Can function as a dual-surface working unit		2m Straight Segment
100*2 cm length		Inner Corner Segment
Dimensions: 100*2 cm length (reversed orientation)		Outer Corner Segment
for amorphous configurations 200 cm chord length		Ø5m Inverted Curved Segment

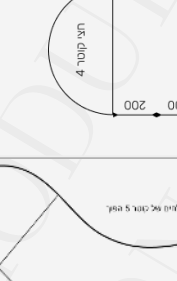

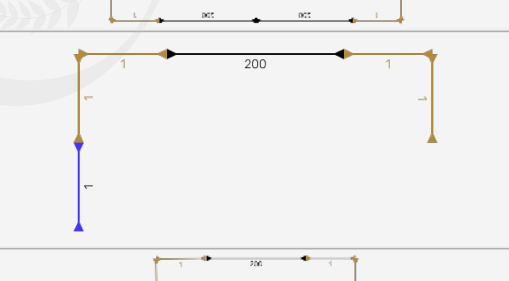

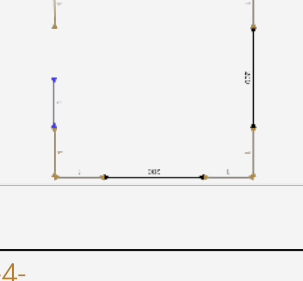

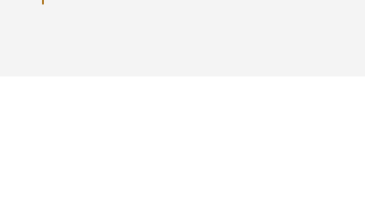

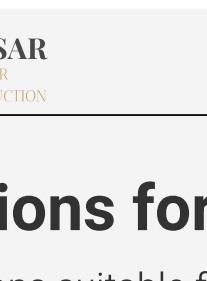

Technical Specification – Buffet Structures

Buffet units are built from modular straight and curved segments, offering a clean, uniform look with consistent dimensions across all sections.

Notes	Structure Details	External Dimensions
Buffet Depth: 80 cm (standard external depth)		
Can connect to straight or curved segments Available in Closed and Open configurations		1m Straight Buffet Segment
Same functionality as the 1m segment Available in Closed and Open configurations		2m Straight Buffet Segment
Two-side connection Designed for transitions between straight and curved segments		Inner Corner Buffet Segment
Available for order as individual segments – total of 8 pieces.		Ø5m Curved Buffet Segment

Component Combinations

The combination of segments enables the creation of structures in circular, oval, amorphous, half-barn, or straight shapes, according to the event requirements.

Description	Shape Descriptions	layout types
The bar is built from modular straight and curved segments, available in various diameters as needed.		Elliptical Form
The bar is built from modular straight, curved, and corner segments in various diameters.		Half-Elliptical Form
The amorphous bar is built from 5-meter curved segments arranged in opposing directions – 5 and inverted 5.		Amorphous Form
A classic, elongated structure made from straight and corner segments, suitable for central placement.		Rectangle
A modular configuration made from straight and corner segments, suitable for non-symmetrical spaces.		Asymmetric Closed Form
A symmetrical, closed structure made from straight and corner segments.		Square

Front Panel Dimensions for Branding

This page presents all front-panel dimensions suitable for branding, organized by segment type.

Note that vertical trim strips are placed between each segment. Available in the following finishes: black / white / oak / mirror / custom color.

Category	Item	Width (cm)	Height/Depth (cm)
Straight Bars	Corner Bar Panel	88.5	104.5
Straight Bars	1m Panel	96	104.5
Straight Bars	2m Panel	196	104.5
Straight Bars	Door Panel	57	104.5
Ø5m Round Bar	Large Panel – 7 pcs	192	104.5
Ø5m Round Bar	Small Panel – 1 pc	95.5	104.5
Ø4m Round Bar	Large Panel – 7 pcs	153	104.5
Ø4m Round Bar	Small Panel – 1 pc	74	104.5
Ø3m Round Bar	Large Panel – 5 pcs	153	104.5
Ø3m Round Bar	Small Panel – 1 pc	74	104.5
Ø5m Inverted	Large Panel	192	104.5
Ø5m Round Buffet	Small Panel	95.5	104.5
Ø5m Round Buffet	Large Panel – 7 pcs	192	84
מזנון עגול קוטר 5	Small Panel – 1 pc	95.5	84
Buffet	2m Panel	196	84.5
Buffet	1m Panel	96	84.5
Buffet	Corner Panel	88	84.5
Buffet	Door Panel	64	84.5

About Us

Caesar Modular Construction specializes in manufacturing bars, buffets, and custom modular solutions. In addition to our standard segments, we also produce special elements – large logos, concept structures, templates, and components made from materials such as acrylic, PVC, metal, and wood.

****Every product is crafted with high precision and engineered for seamless integration in events of any type.**
